

SOAP BOX F1 CHALLENGE

“A fantastic activity to promote creativity and motivate teams!”

Test communication skills, collaboration and resourcefulness of your team whilst constructing the ultimate model kit car. This is the ultimate team test, where working effectively and efficiently means milliseconds — the difference between the podium and the pits!

Using your time effectively is paramount for you and all the other equally determined teams.

Working from a set of construction plans, each Soap Box team has to rally their collective skills to turn a ‘flat-pack’ kit of materials into the ultimate cardboard driving machine and at the same time, create human-horsepower aiming for perfect synchronisation.

Teams will also need to practice grid starts and pit stop changes as these are the vital part of the race.

Once construction is complete the Soap Box teams embellish their cars with brand advertising, corporate messages and company values.

Teams have to qualify to determine grid positions for the Final Grand Pix race.

Then its a race to the chequered flag - who will be victorious and take the title of Soap Box F1 Champions?

The Soap Box F1 Challenge is an exciting experience bringing out the best in your teams, encouraging planning, co-operation and good-natured competitiveness.

Inclusive of:

- Team briefing & event formatting • Public liability insurance • Event Management
- Professional uniformed staff • Event equipment & materials
- All materials disposed of after event • Winner's medals
