

'The World At Your Feet'

PGS Team Penalty Shoot Out Simulator

Ideal to create a dynamic, fun and competitive environment in particular when linked to a football themed event.

Choose your team of penalty takers and take on the challenge and pressure of your own real life penalty shoot out.

Each team will build their own score and either qualify for the next round or be eliminated from the competition.

Depending upon the number of teams we can build Quarter Final, Semi Final and Final with a sudden death shoot out to test the nerves and skill of the players.

There are plenty of combinations to work with most budgets and we can also include personalities from the world of football from a former Premier League Referee to a World Cup Final Official.

Maybe you would like us to build in a couple of former professional players to work with your teams and advise or even take part, the choice is yours.
