

Fraser Penman

Keynote Speaker - Mindset for Success

**What if changing your life wasn't about working harder...
but thinking differently?**

Fraser Penman's story is proof that your circumstances do not define your future.

Born with Oculocutaneous Albinism (OCA1) and visually impaired, Fraser spent much of his childhood battling bullying, low self esteem and a lack of confidence.

Through changing his mindset and applying practical psychological techniques, he transformed his life from a young boy who struggled to believe in himself to performing on stages across the world, becoming a Britain's Got Talent Semi Finalist, and starring in London's West End in Now You See Me Live.

Today, Fraser is a Certified Clinical Hypnotherapist and specialist in human behaviour, delivering his signature interactive keynote, Mindset for Success, to organisations looking to inspire confidence, resilience and high performance.

Blending powerful storytelling, live demonstrations and audience participation, Fraser introduces three simple psychological techniques, **Mindfulness, Subliminal Messaging, and Suggestion & Visualisation**, giving every audience member a practical self help toolkit they can immediately apply in both their professional and personal lives.

This isn't another motivational speech.

It's an interactive psychological experience that educates, entertains and empowers people to think differently, embrace change and become the very best version of themselves.

**Because if you can see it in your imagination,
anything is possible.**
